Here is a link to Andrei Alexandrescu's talk on reflection at CppCon 2022, which addresses your main question: the proposals for reflection are still in the pipeline. Assuming ...

As the aforementioned RFC does not include any reference of encoding spaces as +, I guess using %20 is the way to go today. For example, "%20" is the percent-encoding for ...

OpenSSL Verify return code: 20 (unable to get local issuer certificate) Asked 13 years, 5 months ago Modified 1 year ago Viewed 390k times

@MetaByter I think it is more technically correct to phrase the question as "In a URL, should I encode the spaces using %20 or + in the query part of a URL?" because while the example ...

The output transformation you need (spaces to %20, forward slashes to %2F) is called URL encoding. It replaces (escapes) characters that have a special meaning when part of a URL ...

I searched and found that versions 23.10.0 and 16.20.2 are present in the folders of the same name C:UsersKSAppDataLocalnvm. By analogy, I created a folder v0.12.2 and ...
