New York has formalized its clean energy goals in a new draft State Energy Plan, setting a course to deploy 9.4 GW of battery energy storage systems (BESS) by 2040.

But according to battery energy proponents, several storage sites that are currently operational throughout the Big Apple are helping to alleviate that pressure -- generating ...

The facility will serve as a large-scale battery energy storage system capable of charging from, and discharging into, the New York power grid. When fully functional, the ...

New York has formalized its clean energy goals in a new draft State Energy Plan, setting a course to deploy 9.4 GW of battery energy ...

Battery energy storage will be increasingly necessary to store power from renewable energy, like wind and solar, over the coming years to create a more reliable electric grid that delivers clean ...

When the battery storage project becomes operational, it will stand as the largest battery storage installation in New York City, capable of powering over 10,000 households ...

Energy storage is essential to a resilient grid and clean energy system. Learn about the types of energy storage, available incentives, and more.

The 2024 Energy Storage Order established a statewide goal of deploying 3,000 MW of new bulk energy storage by 2030 and required that NYSERDA submit a draft ...
