Due to its solar resource potential, significant existing hydropower capacity, and planned additions of hydropower and solar PV, the region is well placed to deploy FPV in both stand-alone and ...

With the declining cost of solar photovoltaic (PV) equipment, it is important to predict the future levelised cost of electricity (LCOE) for solar PV systems in this region.

Track noteworthy space objects in your browser in a 3D simulation of the solar system.

The NAAP Solar System Models Lab introduces the universe as envisioned by early thinkers culminating in a detailed look at the Copernican model. First time users of NAAP materials ...

Explore the Solar System in 3D. Planets and constellations will come to life before you. With an astronomical compass, navigate the stars and planets in real time

We begin our journey at the Teluk Kemang Observatory in Port Dickson, with the Sun at the centre of our scale model. From there, we will go north along the shoreline to explore the solar...

This site is maintained by the Planetary Science Communications team at NASA's Jet Propulsion Laboratory for NASA's Science Mission Directorate.

Online 3D simulation of the Solar System and night sky in real-time - the Sun, planets, dwarf planets, comets, stars and constellations
