Does Albania have a power supply security problem?

Albania is a net importer of electricity; power supply security is a challenge. Albania's domestic generation is almost entirely dependent on hydropower since the country's only thermal power plant is currently inoperable.

Why does Albania need to import energy?

Changing weather patterns over the years have forced the country to import energy to cover domestic needs, as a lack of storage capacity requires Albania to sell its generated power during peak months of production.

Why does Albania need hydropower?

Albania, with a population of around 2.85 million, is almost entirely dependent on hydropower for its electricity supply. This gives it an advantage in decarbonising its electricity sector but also makes it highly vulnerable to the changing climate.

Is Albania a net energy importer?

Today, Albania remains a net energy importer as domestic energy production is not able to meet demand. When it comes to renewable energy imports, Eurostat data shows that the country ranks 8th in Europe.

The crisis had an immediate impact on increasing electricity market (import) prices in Albania (reached 482 Euro/MWh in August 2022) - Import prices have followed market prices
