---

Explore the intelligent production line for new energy aluminum alloy battery trays, featuring CNC machining, glue coating, friction stir welding, and airtightness testing.

Offering significant weight savings, Magna's aluminum enclosures are 20% lighter than comparable steel designs and highly scalable, allowing for the production of various enclosure ...

From concept and design to fabrication and assembly, Bull Metal Products manufactures custom battery enclosures, lithium battery boxes, and battery cabinets with the highest quality and ...

Aluminum EV battery housing emerges as a solution that balances durability, efficiency, and performance. Through advanced fabrication methods and careful consideration of alloy ...

Fabricated Metals manufactures only heavy duty enclosures that provide the strength and durability using 12 GA steel and aluminum in our enclosures. Flexibility is also accounted for ...

Speira develops aluminium for prismatic battery cell housings and covers, laying the foundation for optimising the performance, safety and sustainability of your battery systems.

Openex specializes in custom fabrication of platforms, tanks, enclosures, and structural parts for lithium battery production lines using carbon steel, stainless, aluminum, and nickel alloys.

When designing modern battery cabinets, engineers face a critical question: How can we ensure decades of reliable service in harsh environments? The answer often lies in ...
