What is the backup power battery runtime for power outages calculator?

The Backup Power Battery Runtime for Power Outages Calculator helps you determine how long your backup battery system will sustain power during these outages. This tool is particularly useful for homeowners, business operators, and anyone responsible for critical infrastructure.

How long does a power outage last in Texas?

The average power outage in Texas lasts 2.5 hours. At low energy use, the single-unit Base battery can protect an average household for 20 hours. At moderate energy use, backup duration is typically 12-14 hours. You can extend this time by using fewer power-hungry appliances.

How does a base battery work?

When the grid is working and chances of outages are low, Base sends some energy from the battery back to the power grid. This process is called grid-balancing. Base batteries deploy energy to the grid faster than any other service, which is how Base is able to recoup the cost of the battery equipment and keep prices low for homeowners.

When do batteries charge?

The batteries charge during off-peak hours, like midday and late at night, when energy is more available and demand is low. When the grid goes down, the battery hub separates your house from the grid and all the energy in the battery goes to power your home.

If solar is actively charging your battery during an outage, your backup duration may extend beyond the app's estimate. Solar isn't currently factored into the calculation because predicting ...

This free tool lets Texas homeowners see how long they'd stay powered in an outage with Base -- with variables for battery state of charge, energy consumption, and configuration type.

Telecom batteries provide instantaneous power during grid outages via electrochemical energy storage. VRLA batteries use absorbed glass mat (AGM) technology for ...

How do I know if I'm using battery power or grid power? How should I interpret the Base App "status" bar with "power source", "battery charge", and "estimated backup time"?
