Latin America holds a promising position in the global High Temperature Energy Storage System market, with Brazil serving as the region's primary growth engine.

These developments underscore the strategic importance of hybrid systems that combine dispatchable solar generation with emerging hydrogen applications, particularly in ...

A heat wave drove Brazil's power demand up to a record high of 102 GW last week. However, it also affected solar power generation ...

These are the results of the most recent market report published by the solar thermal industry association ABRASOL. The photo shows one of the very ...

As we count down to the Solar World Congress 2025 in Fortaleza, let's dive into Brazil's solar energy history. Fifteen years ago, ...

The Northeast region of Brazil has exceptional potential for solar energy generation, thanks to its high levels of solar radiation throughout the year. This underscores the need for ...

A heat wave that passed through Brazil earlier this month pushed energy consumption in the country to record levels. It also raised questions about the impacts of high temperatures on a ...

These are the results of the most recent market report published by the solar thermal industry association ABRASOL. The photo shows one of the very few solar industrial heat plants in Brazil.
