---

We construct, own and operate large-scale battery storage projects today that will transition us to the grid of tomorrow, with a growing portfolio of over 9,000 MW of battery storage projects in ...

The BESS integration marks Egypt's first project to be implemented under the Government of Egypt's fast-track 4GW Emergency Renewable Energy Program, which aims to ...

The city's ambitious plan to derive 42% of its electricity from renewables by 2030 faces a critical challenge: intermittent power supply. Solar panels sit idle at night while wind turbines stall ...

Well, Cairo's new large-scale battery energy storage project isn't just talk - it's the real deal. With construction kicking off last month near the Benban Solar Park, this 1.1GW behemoth could ...

Cairo, home to 22 million people, faces a paradox: balancing rapid urbanization with sustainable energy solutions. The Egyptian government's 2025 Energy Storage Policy aims to transform ...

The project aims at providing the scientific, technological and policy basis required for the development and implementation of large-scale energy storage in Egypt, enabling increased ...

Cairo's energy storage sector isn't just growing - it's rewriting the rulebook for sustainable urban development. With Egypt aiming to achieve 42% renewable energy by 2035 ...

Egypt is exploring the potential of energy storage through batteries to combat our electricity oversupply problem: As Egypt continues to suffer from a major oversupply of electricity, the ...
