On February 20, 2025, the Minnesota Public Utilities Commission approved the settlement agreement for Xcel Energy's 2024 ...

As the United States grapples with shifting political winds, developers in the distributed solar and storage market are facing a ...

Xcel Energy would add 3.2 GW of wind, 600 MW of battery storage and 400 MW of solar by 2030 under a settlement agreement filed earlier this month with Minnesota regulators.

As the United States grapples with shifting political winds, developers in the distributed solar and storage market are facing a potential policy storm.

Xcel agreed to devise a new model for planned and scaled distributed solar and storage capacity procurement and file it at the commission by Oct. 3, 2025.

The settlement represents an important evolution in Xcel's clean energy transition strategy, emphasizing distributed renewable energy, battery storage, and customer savings ...
