---

The bifacial dual sided glass module (G2G) generates more electricity by converting direct, radiant and scattered solar energy on both the front and the back side of the module.

This review paper presents a comprehensive review of current developments in the BIPV area, with a focus on two key technologies: bifacial solar systems (BSC) and semi ...

Jinri T Series are customized bifacial double glass transparent solar PV modules with 5%-70% transmittance, which is specially desinged photovoltaic panels for applications like Building ...

To address this issue, ongoing research focuses on developing lightweight technologies and lightweight BIPV modules. This study introduces a novel design ...

This trend brought a change as well in the solar module construction: while earlier standard modules had a white foil as a backsheet, nowadays, bifacial standard photovoltaic modules ...

Among our product portfolio is the High-Power Density low-glare module (GMD series), 3-in-1 Building-Integrated solar roof materials (BiPV series), Bi-Facial double glass Fire Test Class A ...

Jinri T Series are customized bifacial double glass transparent solar PV modules with 5%-70% transmittance, which is specially desinged ...

Our dual glass modules use the same internal circuit connection as a traditional glass-backsheet module but feature heat ...
