---

The high-transmittance layout design offers solutions for project scenario such as sunroom, greenhouse, skywalk, glass roof, etc; Raytech offers product design and adhesive installation ...

160-180W High Transmittance Double Glass Bifacial Frameless Solar PV Module Working Condition Compatibility & Safety High Resistance to High Temp., High Humidity, Sand, Acid ...

Significant amount of near infrared light passes through bifacial cells. Double-glass structure shows a loss of ~ 1.30% compare to the glass/backsheet structure under STC measurements.

Jinri T Series are customized bifacial double glass transparent solar PV modules with 5%-70% transmittance, which is specially desinged photovoltaic panels for applications like Building ...

Unique layout design can meet the requirements of excellent light transmittance and waterproof; Excellent Low-light Performance

The module is equipped with thermocouples to detect the temperature of the intermediate TC hydrogel in real time. 30 & #176;C TC glass module is in a high transmittance state, ...

Solar float glass is widely used in photovoltaic field to make solar double glass module, because of its high visible light transmittance. 532 nm nanosecond laser was selected to cut solar float ...

The combined effects of two important factors, namely glass transmittance (?) and natural ventilation, on the dynamic thermophysical behaviors of STPV-DSF were investigated ...
