The Department of Energy (DOE) Loan Programs Office (LPO) is working to support deployment of energy storage solutions in the United States to facilitate the transition to a clean energy ...

These innovative CO2 batteries from Energy Dome promise long-duration energy storage for the grid, and reliable 24/7 clean power for data centers.

From iron-air batteries to molten salt storage, a new wave of energy storage solutions is set to unlock resilience for tomorrow's grid.

Latest news on energy storage projects, BESS, capacity expansion, and regulatory updates across Europe, US & Canada, Latin America, and Asia Pacific. Discover how energy ...

New York Gov. Kathy Hochul has launched New York's first bulk energy storage request for proposals (RFP), intended to procure 1 GW of bulk energy storage as part of New ...

The project will be delivered in stages, with initial construction expected to begin in late 2026 and full buildout of solar and battery facilities planned for 2027 and 2028. Officials at ...

NLR researchers are designing transformative energy storage solutions with the flexibility to respond to changing conditions, emergencies, and growing energy ...

Adding bulk energy storage to New York's grid will lower costs, optimize the generation and transmission of power, enhance energy grid infrastructure, and ensure the ...
