---

Construction has begun in Estonia on two energy storage facilities with a total capacity of 200 MW and 400 MWh. On Thursday, a symbolic groundbreaking ceremony took ...

Estonia's energy storage capacity is expanding rapidly. By the end of 2024, the country had 6 MW of battery storage, but this has now grown to over 30 MW. Additionally, ...

Estonia is launching a major 300 MW solar-plus-storage project in Ida-Viru County, transforming a former quarry to boost renewable energy and energy independence.

Recently, Estonia welcomed its largest solar park, capable of powering 35,000 households, now another such step is the development of two battery energy storage systems in Harju County, ...

Sunly, in collaboration with Metsagrupp, is developing a 16 MW / 32 MWh battery energy storage system (BESS) next to the 45 MW ...

Discover how Estonia is enhancing grid stability with 400 MWh battery storage plants, preparing for Baltic power grid independence by 2025.

Estonian authorities have granted a permit for a massive energy storage system at Baltic region's largest solar installation.

The launch of the Auvere battery storage facility marks a turning point in Estonia's energy landscape. With a capacity of 53 megawatt-hours--enough to cover just 2-3% of ...
