What is a containerized mobile substation?

Containerized mobile substations are sheltered and address applications in challenging environmental conditions including areas with high pollution, high humidity, extreme temperatures or sand storms. Containers are easy to transport and fast to install, by reducing foundation works as well as installation and commissioning effort on site.

Where are the containerised substation & control rooms assembled?

The containerised substation and control rooms are assembled in G2 Energy's own warehouse facility in Milton Keynes, allowing us to minimise delivery timescales and provide bespoke solutions in a fast and efficient manner.

Does Siemens Energy offer a pre-commissioned substation solution?

Depending on customer requirements Siemens Energy can deliver a fully pre-commissioned substation solution equipped with power transformers as well as high- and medium voltage, making it the most cost-effective solution to simplify your on-site schedule. Skid-mounted solutions can be delivered with GIS, AIS and Dead Tank arrangements.

What is a prefabricated substation?

Prefabricated substations with up to 420 kV : Siemens Energy provides a large range of prefabricated substations that are equally suited for either temporary or permanent use in challenging grid expansion- and maintenance programs or as emergency response.

View our prefabricated container substation product, which allows for mobility and rapid deployment. Join META Power Solutions online to learn more ...

MA Group is expanding its offering for battery energy storage systems (BESS) and large-scale photovoltaic power plants, with the launch on the European market of its new ...

G2 Energy design, build and install bespoke Container Substations for both the DNO Contestable Works and the Client's electrical infrastructure. Find ...
