---

Finland has launched the Nordic region's first grid-forming battery energy storage system (BESS) at Fingrid's Virkkala substation. This 30 MW/30 MWh facility was developed by ...

Developer Ilmatar and investor Nuveen Infrastructure have officially commenced operations of a 30MW/41MWh Battery Energy Storage System (BESS) in northern Finland.

In a small Finnish town with a big climate goal, an unassuming tower of sand is quietly storing solar and wind energy all ...

In the town of Kankaanpää, western Finland, engineers have built the world's first commercial-scale sand battery, using low-cost, abundant sand to store excess renewable ...

The system captures surplus energy generated from renewable sources, such as solar and wind, and stores it in the form of ...

Developer Ilmatar and investor Nuveen Infrastructure have officially commenced operations of a 30MW/41MWh Battery Energy ...

For solar PV, short-term behind-the-meter energy storage in the form of batteries can be sufficient to increase the self-consumption of residential solar PV systems during the ...

The installation is the first large-scale battery in the Nordics to meet the new grid-forming requirements set by Finland's transmission system operator Fingrid, which only ...
