We are offering mini renewable power stations in a Off-Grid shipping Container ready to be deployed worldwide. These include solar PV panels and mountings.

This revolutionary supercapacitor is already being manufactured and used at scale, and we welcome partners to implement graphene and assembly factories around the world.

Plug-and-play graphene energy container system designed for grid, partial-grid, and microgrid installations. It delivers clean, resilient, long-duration power storage without thermal risk, toxic ...

High power usage per square foot for lighting, HVAC, and hydroponic systems makes this a perfect fit for graphene storage. Dramatically reduces utility costs while ensuring uptime in ...

Our 20 and 40 foot shipping containers are outfitted with roof mounted solar power on the outside, and on the inside, a rugged inverter with power ready battery bank.

This review presents a comprehensive examination of graphene-based materials and their application in next-generation energy storage technologies, including lithium-ion, ...

Microgreen solutions provide reliable power and energy storage for off-grid regular loads, grid-support cases and emergency back-up, with switchable energy input from renewable energy, ...

Microgreen solutions provide reliable power and energy storage for off-grid regular loads, grid-support cases and emergency back-up, with ...
