From being unable to withdraw money or fill up with petrol, to those hit by train and flight cancellations, the people of Barcelona describe the impact of Spain's mass power cut

From being unable to withdraw money or fill up with petrol, to those hit by train and flight cancellations, the people of Barcelona describe the impact ...

The blackout that took down the Iberian grid serving Spain and Portugal in April was the result of a number of smaller interacting ...

Reactive power management is key to preventing blackouts in renewable-heavy grids. Learn how Spain's blackout may reveal the need for updated regulations.

A series of disruptions in power flows on the Spanish system that are not fully explained caused high-voltage levels to drop, the Spanish government investigation found.

You might think that a power plant could easily start generating power, but in reality, only a limited number of facilities have everything they need to handle a black start.

Spain and Portugal have been hit by widespread blackouts following a cascading failure on the high-voltage transmission system forcing them to attempt a complicated "black ...

On April 28, 2025, the Iberian Peninsula experienced a dramatic blackout. At exactly 12:33:30, a cascading failure disconnected the grids of Spain and Portugal from the ...
