Does Norway have a mobile network?

Norway's mobile network landscape is competitive, well-regulated, and technologically advanced. The country boasts excellent mobile coverage and high-speed internet access, with the majority of its population covered by 4G, and growing 5G coverage.

Will 5G improve mobile coverage in Norway?

The new 5G network will provide better mobile coverage and gradually better access to broadband across the country, which will reduce the vulnerability of an increasingly digitised society," said Linda Hofstad Helleland. In March 2020, Telenor became the first Norwegian mobile operator to offer 5G connectivity to customers.

Which mobile network provider has the most coverage in Norway?

Which mobile network provider in Norway offers the most extensive coverage? Telenor offers the most comprehensive coverage in Norway, reaching even the most remote corners of the country. How do I get a SIM card in Norway?

Who owns 5G in Norway?

No one company owns 5G. It is planned and managed by the 3rd Generation Partnership Project (3GPP), a consortium of companies and organisations including infrastructure suppliers, device manufacturers, mobile network operators and vertical service providers. Which mobile operators support 5G in Norway?
