How much does a solar battery cost in 2025?

The average cost to install a solar battery in 2025 ranges from \$9,000 to \$19,000, with most homeowners spending about \$13,000. The total price depends mainly on the type and capacity of the battery, as well as the complexity of your system.

How much does a solar battery cost?

A fully-installed 13.5 kWh solar battery costs \$13,500 on average, after claiming the 30% tax credit. This price can vary from project to project as there are many factors that influence battery storage costs. Update: The homeowner-claimed tax credit for home battery storage is only available until the end of 2025.

How much does solar battery maintenance cost?

The cost to hire a local solar company to inspect and maintain your battery system is anywhere between \$150 and \$300 on average. Solar batteries last longer when you maintain them regularly. Maintenance includes an inspection, rotating the batteries, and cleaning the terminals.

Can solar panels and batteries save money in California?

Pro tip: In California, homeowners combining solar panels and batteries can save up to \$10,000 with SGIP and federal incentives together. The type of battery you choose impacts both the upfront cost and long-term value. Here's a 2025 comparison by chemistry:

A report from the National Renewable Energy Laboratory (NREL) estimates that a solar battery including installation can cost ...

Lithium-ion batteries, often deemed more advanced, can range from \$800 to \$3,000 depending on their capacity and brand. They ...

A report from the National Renewable Energy Laboratory (NREL) estimates that a solar battery including installation can cost almost \$19,000* to install, including the price of the ...

As of early 2025, the average cost to install a home solar battery in the U.S. ranges between \$9,000 and \$18,000 before incentives. ...
