There are currently 4,829 approved rooftop solar, inverter and storage products across Australia. In the second half of 2024 there were 159,011 rooftop PV units installed across Australia.

As of March 2025, the new generation and energy storage capacity pipeline has surpassed 51GW, representing a staggering 37% ...

Australia's solar and energy storage sectors delivered strong performance during the third quarter of 2025, with grid-scale solar generation reaching 1,699MW average output ...

The Australian Energy Market Operator (AEMO) reported substantial increases in solar and wind energy contributions, with grid-scale solar up by 10%, rooftop solar by 16%, ...

Integrating battery storage with solar power systems is crucial for addressing intermittency and maximising energy utilisation. The Australian battery storage market is experiencing rapid ...

Currently storage of electrical energy in Australia consists of a small number of pumped hydroelectric facilities and grid-scale batteries, and a diversity of battery storage ...

In 2024, 36% of Australia's total electricity generation was from renewable energy sources, including solar (18%), wind (12%) and hydro (5%). The share of renewables in total electricity ...

Australia's current storage capacity is 3GW, this is inclusive of batteries, VPPs and pumped hydro. Current forecasts by AEMO show Australia will need at least 22GW by 2030 - ...
