How do I apply for a new electricity supply in Cape Town?

The City of Cape Town's new online Energy Services platform can be used to apply for a new electricity supply or a modification to an existing electricity supply within the City of Cape Town's electricity supply area. Note: PDF applications will be phased out, and you are encouraged to use the Energy Services platform for all new applications.

What is the city of Cape Town electricity supply by-law?

City of Cape Town Electricity Supply By-law applies. The EG must obtain from the City a written agreement to operate the generating facility in parallel with its network. ERA, Schedule 2 generation licencing or registration of the EG applies.

How do I connect a reciter to a 50W base station?

The DC supply to the reciters is via the system control bus ribbon cable. The connections between modules at the front of a single 50W base station are shown below. The PA is powered by a direct connection from the PMU. The reciter is powered from the PMU via the subrack interconnect board and system control bus ribbon cable.

What is a substation in a power system?

Substation (of a power system): part of a power system, concentrated in a given place, including mainly the terminations of transmission or distribution lines, switchgear and housing and which may also include transformers. It generally includes facilities necessary for system security and control (e.g. the protective devices) [IEC]
