Does Huawei's fire-free energy storage system redefine safety?

Abstract: With the battery pack-level thermal runaway control, Huawei's fire-free energy storage system (ESS) redefines safety. [Shenzhen, China, December 24, 2024] Huawei Digital Power and TÜV Rheinland jointly completed ESS safety tests on Huawei's Smart String & Grid Forming ESS Platform (LUNA2000-4472 series and LUNA2000-215 series).

What is Huawei digital power?

With safety as its top priority, Huawei Digital Power is driving the healthy and sustainable development of the energy storage industry, and making valuable contributions to the creation of clean, low-carbon, safe, and efficient new power systems.

What is energy storage safety classification?

These efforts aim to ensure the high-quality and healthy growth of the energy storage industry. The safety classification comprises three levels: Level 1 (Basic): The ESS complies with basic laws, regulations, and standards, meeting the safety requirements for market admission.

Its products have achieved both 2Pfg 2511 and VDE-AR-E 2510-50 energy storage system certification, and passed the most rigorous certification standards in the world.

Huawei's Smart String Grid-Forming ESS sets a new standard for safety with its refined protection features. With innovative active pack-level thermal ...

Conducted under the scrutiny of TÜV Rheinland at a national key fire safety laboratory, this test sets a new benchmark for safety standards in energy storage systems (ESS).

In demonstrating the prowess of the Smart String & Grid Forming ESS, four mass-produced systems were tested under conditions that mirrored actual operational scenarios. All ...

This groundbreaking test, conducted under real-world scenarios and innovative methodologies, validates the ESS's capabilities ...

This innovation is driving the energy storage industry toward higher quality standards. Zhou Tao, President of
