Smart PV Controller Features: Arc Fault Protection PV Ground-fault Protection PID Recovery Smart String Level Disconnecter Smart Connector Temperature Detector MBUS

Huawei SUN2000L-150K-MG0, three-phase inverter 150kW, 7 MPPT, 98.8% efficiency, IP66, PID recovery, string disconnection, ground protection and AFCI.

Introducing Huawei's industry-leading PV Ground-Fault Protection, this PV controller ensures a rapid shutdown of the on-grid system within 15 milliseconds in a ground fault. This feature ...

Read this document carefully before installing and operating the inverter. The symbols that may be found in this document are defined as follows. Indicates a hazard with a high level of risk ...

Thanks to protection class IP66, it is also designed for use in up to 100 % humidity, temperatures from -25 °C to +60 °C and altitudes of up to 4000 meters. Further ...

1 The maximum input voltage is the upper limit of the DC voltage. Any higher input DC voltage would probably damage inverter. 2 Any DC input voltage beyond the operating voltage range ...

Thanks to protection class IP66, it is also designed for use in up to 100 % humidity, temperatures from -25 °C to +60 °C and altitudes of ...

Method 2: Turn off the two DC switches at the bottom of the inverter. Method 3: If AFCI is enabled, the inverter automatically performs arc fault detection and triggers a rapid shutdown ...
