---

Scottish wave energy company Mocean Energy has signed a memorandum of understanding (MoU) with Netherlands-based floating solar developer SolarDuck to develop ...

By strategically integrating electric charging, hydrogen/ammonia refueling, and automated servicing infrastructure into offshore wind, solar, and hybrid platforms, these ...

The hybrid energy containers consisting of solar and fuel cell technology offer safe and environmentally friendly power generation for remote areas such as offshore wind farms. The ...

A hybrid solar/wind energy/fuel cell ship power system model is constructed for ships, and a hybrid solar/wind energy power supply and hydrogen production model is ...

Imagine stacking solar panels, lithium batteries, and smart controls into shipping containers. These modular power units can slash energy costs by 40-60% while cutting emissions faster ...

Offshore platforms are increasingly adopting hybrid power systems that combine renewable energy with traditional gas turbines. These systems offer the dual benefit of ...

Unlike traditional approaches that rely on onshore power grids or single-source renewable systems, the OMPP combines offshore wind and solar power with hybrid energy storage, ...

Underwater data centres powered by offshore wind, solar and wave energy, and cooled by seawater systems, offer a route toward zero-carbon artificial intelligence.
