---

Adoption of grid-scale energy storage systems for enhancing grid stability, defer capacity upgrades and improving resource adequacy. A stable and efficient power grid is no ...

Tata Power, India's largest integrated power company, has secured approval from the Maharashtra Electricity Regulatory Commission (MERC) to install a 100MW Battery ...

New Delhi: India's energy storage sector is set to grow by over 12 times to 60 GW by FY32, driven by a massive increase in variable ...

An innovative gravity-driven energy storage design from Scottish start-up Gravitricity is being cued up for a first installation in India, following the award of just under ...

With schemes like the National Solar Mission and expanding wind power capacities, gravity energy storage can help stabilize the grid ...

The project is designed to play a key role in supporting the state's clean energy goals by enhancing grid stability and ensuring ...

With schemes like the National Solar Mission and expanding wind power capacities, gravity energy storage can help stabilize the grid by addressing intermittency. ...

NTPC Limited signed an MOU with Energy Vault Holdings, Inc. in 2022 to explore implementing Energy Vault's EVx gravity-based energy storage technology. The EVx system ...
