How much do commercial solar panels cost?

Generally, installing solar panels on businesses costs a bit less per watt because the systems are larger, but the total costs will be higher. In 2025, the average cost for commercial solar panels is just about \$2.00 per watt. There is a lot to consider when figuring out how much you'll spend on a solar installation.

Why do solar panels cost so much?

The cost of solar panels buyers pay is also affected by the local cost of work, the type of roof, license cost, etc. In some states of the US, prices have declined due to great sunshine, like California and Texas, and more competition among solar panel installers.

Do used solar panels cost more than new?

Used solar panels will cost less than new solar panels, however, we wouldn't recommend using them to power your home. Used solar panels likely won't be covered under the manufacturer's warranty, and you'll sacrifice performance. How much do solar panels cost if I get multiple quotes?

How much does a solar panel installation cost?

Solar panel installation costs vary by the installation company and project scope, making it challenging to pinpoint exactly how much you'll pay to have a pro install your solar panels. However, the U.S. Department of Energy estimates that installers add around \$2.25 per watt to the cost of a solar panel installation.

For residential systems, the cost of components of solar panels accounts 62% of the overall costing, while soft costs account for nearly 38%. In commercial installations, the hard ...
