SSE has acquired the project development rights for a 120MW/240MWh grid-scale battery energy storage system (BESS) project in Ireland's Midlands from UK-based renewable ...

SSE has grown its secured battery energy storage system (BESS) pipeline in Ireland to 300MW with the acquisition of the 120MW/240MWh Thornsberry BESS project near ...

Ireland's climate is surprisingly suitable for off-grid generation. A mix of solar PV panels and small wind turbines, supported by battery storage, can provide year-round coverage.

We currently have more than 300MWs of battery storage capacity in operation in Ireland, making it one of the largest battery portfolios in Europe. We plan to develop a pipeline of large scale ...

Battery energy storage systems, often referred to as Bess, are regarded as a vital part of the Ireland's fledgling renewable energy sector and demand for them has never been ...

To address the challenges in Europe, such as electricity price volatility, unstable power supply, and increasing renewable energy penetration, GSL ENERGY has delivered a ...

SSE has acquired the project development rights for a 120MW/240MWh grid-scale battery energy storage system (BESS) ...

As we look towards 2025 and beyond, the integration of smart AI-driven battery management systems will enable Irish households to automatically optimise their energy ...
