What is the electricity and power supply like in Panama?

What's the electricity and power supply like in Panama? Panama power outlets operate with a voltage of 110V-120V and a frequency of 60 Hz. From a touristic standpoint, most visitors will have no issues connecting to electricity -especially in the most popular areas of the country- since nearly 97% of Panama residents have access to electricity.

Are there power outages in Panama?

In general, though, power outages are rare. Half of Panama's electricity is generated through hydropower. Panama also boasts the largest wind farm in Central America, with over 100 wind turbines generating roughly 7% of the country's electricity needs.

How many people in Panama have no electricity?

According to satellite analysis of population and electrification infrastructure, conducted by Waya Energy and IIT-Comillas in 2023, there are around 155,404 households without electricity in Panama. (3) Population & Demographic Indicators 2022, UNDESA, 2022. (4) OLADE Population, Energy Hub, IDB, 2024.

Do I need a power adapter in Panama?

Since the sockets in Panama are the same as the ones in the United States, you won't need a US-to-Panama power adapter for your trip there. But, if you bring something like this universal power adapter, you'll have two extra USB ports for charging any extra devices you have, which makes things pretty convenient if you ask us.
