Better yet, recent projections from the EIA forecast 18.2 GW of new utility-scale battery storage in 2025. Even without residential or commercial storage projects, this would be ...

The global market for energy storage is set to reach unprecedented levels next year, with utility-scale projects leading the ...

Better yet, recent projections from the EIA forecast 18.2 GW of new utility-scale battery storage in 2025. Even without residential or ...

The global market for energy storage is set to reach unprecedented levels next year, with utility-scale projects leading the charge, according to BNEF. BNEF forecasts that ...

The U.S. is on track to add 60 GW of clean energy capacity in 2025, according to developer projections. If those numbers hold, that would represent 26% growth, compared to 2023's ...

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record ...

BloombergNEF forecasts a record 94 GW (247 GWh) of utility-scale storage in 2025--a 35% rise--driven by China's storage mandates. US tariffs, policy shifts and LFP ...

In October 2024, EIA reported that battery storage capacity was expanding rapidly in the U.S., and that trend is also expected to continue into 2025.
