Can you use shipping containers for classrooms?

Using shipping containers for classrooms has the same benefits as building them from scratch using regular materials. You will receive a fully protected area that can be modified to suit your needs. Creating computer labs, a classroom, or a recreational space -- shipping containers are suitable for any purpose.

How much does a shipping container classroom cost?

Typically, shipping container structures will cost less than half the price per square foot of traditional construction. It will cost approximately \$150,000 to construct a shipping container classroom with the same area as a 2,000-square-foot traditional classroom.

What can you do with modified shipping containers?

Shipping containers are often used as storerooms for school supplies and furniture whenever the building undergoes a renovation. Some innovative schools also use them as an extension to existing brick-and-mortar buildings. This saves both time and money. A library or a laboratory inside modified shipping containers is not a new thing nowadays.
