What makes a container house unique?

Resistance to severe weather: prepared to withstand long trips overseas, container houses are very resilient to inclement weather and can be located anywhere on the planet. Constructed in accordance with the rules of the IBC: during the design phase and construction phase we have followed all guidelines from the US Residential Building Code.

Are containers a good building material for a house?

Containers are an excellent building material for houses, as they are designed to withstand heavy internal and external loads under the most adverse conditions that a house would ever have to endure. In addition, the container structure is stronger than a traditional wood frame and it is fire, mold and insect resistant.

Do you own your container home as an asset?

AND you own your container home as an asset! The Porter, currently living as an Airbnb in Johnson City, is our favorite container home project to date. We took the customer's dream and made it come to life with luxurious add-ons, pristine location, and an expansive feel.

How do I choose a container home?

From single-container homes to multi-unit builds, offices, and heavy-duty commercial setups -- this is where flexibility meets firepower. Choose a container home model and adjust the sliders to calculate when your rental investment will turn profitable. These values should only be used as estimates AND you own your container home as an asset!
