Our work focuses on commercial BESS solutions, solar generator systems, solar-powered air conditioning, and solar lighting -- for both residential and commercial applications.

The RePower project aims to improve access to electricity in rural Africa by installing renewable plug-and-play microgrids in Madagascar, Niger, and ...

Renewables developer GSU and the Madagascar Ministry of Hydrocarbons and Energy, have agreed to develop a 50 MW solar plant and a 25 MWh battery energy storage ...

The RePower project aims to improve access to electricity in rural Africa by installing renewable plug-and-play microgrids in Madagascar, Niger, and Senegal.

With 65% of its population lacking access to reliable grid electricity, decentralized power solutions have become critical. This article explores the landscape of outdoor power systems in ...

What is a Bess system?At the heart of WEG's BESS solution is an advanced energy control and management solution. This sophisticated system coordinates different operation modes, ...

Discover how Madagascar is becoming a hotspot for innovative outdoor power systems, blending renewable energy with rugged reliability for off-grid communities.

As Madagascar's capital seeks reliable energy solutions, Battery Energy Storage Systems (BESS) are emerging as game-changers for outdoor power supply. This article explores how ...
