Equatorial Guinea's oil revenues could either boost or bottleneck energy storage development in Malabo. While some argue for "green transition" investments, old habits die hard.

The Malabo Pumped Storage Power Station is stealing the spotlight these days, and for good reason. As of March 2025, this engineering marvel in Equatorial Guinea is rewriting the rules ...

You know, over 40% of communication outages in Sub-Saharan Africa stem from erratic power supply - and Malabo's mobile networks aren't immune. With 5G expansion accelerating since ...

But with their new 2025 energy storage policy, they're finally tackling the elephant in the room - how to store all that potential solar and wind power. The city currently relies on diesel ...

MITEI's three-year Future of Energy Storage study explored the role that energy storage can play in fighting climate change and in the global adoption of clean energy grids.

The Photovoltaic-energy storage-integrated Charging Station (PV-ES-I CS) is a facility that integrates PV power generation, battery storage, and EV charging capabilities (as shown in ...

In July 2021 China announced plans to install over 30 GW of energy storage by 2025 (excluding pumped-storage hydropower), a more than three-fold increase on its installed ...

That's where the Malabo Energy Storage Project steps in - it's like giving Equatorial Guinea's capital a super-sized power bank. As Africa's first grid-scale battery storage system, this \$200 ...
