How much does electricity cost in Malta?

Malta, December 2023: The price of electricity for households is EUR 0.134 per kWh or USD 0.146 per kWh. The electricity price for businesses is EUR 0.149 kWh or USD 0.162 per kWh. This includes all components of the electricity bill such as the cost of power, distribution and taxes.

Why is Malta connected to the European power grid?

Since 2015, the Malta-Sicily interconnector allows Malta to be connected to the European power grid and import a significant share of its electricity. At 4.9%, Malta had the lowest share of renewables as part of gross inland energy consumption in the EU in 2017.

What is energy in Malta?

Energy in Malta describes energy production, consumption and import in Malta. Malta has no domestic resource of fossil fuels and no gas distribution network, and relies overwhelmingly on imports of fossil fuels and electricity to cover its energy needs.

How many electricity plants are there in Malta?

Malta has four electricity plants operational and the total combined nominal installed capacity is 537.8 MW. The Malta-Sicily Interconnector, which has been in operation since April 2015, allows for an electricity link between the Maltese Islands and the Italian electricity market has bidirectional flow capacity of 200 MW.

Minister Dalli said the government received 16 offers for approximately 40 megawatts of energy storage capacity. "This shows the level of international interest in this ...

Malta has some of the lowest household electricity prices in the EU. In 2018, the average household electricity price was 0.1306 EUR/kWh, only higher than those in Hungary, Lithuania ...

As of 2017, most of the electricity generated in Malta was from natural gas, with oil as a backup. Natural gas has only been used for generation on Malta since CCGT systems were installed at Delimara Power Station in 2015, before which oil was the main fuel used. Oil has been the primary fuel for electricity generation for many decades before 2015, although Malta also possessed coal generation capacity from 1980 until 1996. Renewable energies have a small but growing share ...

We issued a call for offers for around 40 megawatts of battery energy storage systems, which are mass
