The HY Module for Bulkers is a compact, containerised solution including an energy storage system. Its EMS will optimise the power production and consumption onboard.

ABB's containerized energy storage solution is a complete, self-contained battery solution for a large-scale marine energy storage. The batteries ...

Corvus Energy is at the forefront of developing zero-emission solutions, including a full range of marine battery energy storage and fuel cell systems. Many of the world's first all-electric and ...

The demand for green solutions in the maritime industry is driving an increased use of clean electrical power systems that utilise energy storage. The energy storage unit from ...

The system can be integrated as an all-electric or a hybrid power system. Benefit from increased safety, flexibility and efficiency by installing energy storage onboard.

Whether it's a new build or a refit, a hybrid or an all-electric vessel, these battery-based energy storage solutions are helping redefine modern ship propulsion.

ABB's containerized energy storage solution is a complete, self-contained battery solution for a large-scale marine energy storage. The batteries and all control, interface, and auxiliary ...

The system can be integrated as an all-electric or a hybrid power system. Benefit from increased safety, flexibility and efficiency by installing energy ...
