Will Morocco become a major exporter of solar panels?

Officials hope the project will turn Morocco into a major exporter of solar panels. The plant will have a production capacity of 30,000 tonnes per year, of which 85 percent will be exported to countries in Africa and other foreign markets, the ministry said, adding that the project will create 1,500 direct jobs and 2,000 indirect jobs.

What is Morocco's solar investment opportunities report?

The 'Morocco: Solar investment opportunities' report provides an overview of Morocco's business environment, and major macroeconomic trends, while analysing the regulatory framework and infrastructure network of the country.

Could Morocco develop a \$31 billion solar market?

Morocco has been locked in a drive to attract foreign capital into manufacturing and other sectors, including tourism and renewable energy. Earlier this month, a study by the Rabat-based Imal Initiative for Climate and Development said Morocco could develop a \$31 billion solar market.

What is Morocco's solar future?

The report's most likely 'medium' scenario forecasts that Morocco will reach 2.27 GW of total installed solar capacity by 2027, and 2.97 GW by 2028. Benjamin Clarke, Global Markets Manager at SolarPower Europe (he/him) highlighted; "Morocco's solar future is shining bright!"
