What is the future of a frequency inverter?

Nowadays fuel cells powered by solar and wind energy are emerging as a latecomer to the market with their low prices. The most important feature of this power generation equipment is the capacity small and decentralized, the future of the frequency inverter to adapt to such new energy sources, both high efficiency and low consumption.

Where can I buy a high-quality frequency inverter?

In the ST- Shop you can buy high-quality frequency inverters in the power range from 0.75kW to 1000kW. You will find different model series, which are suitable for different applications. Sourcetric offers beside the proven products also product novelties, to which you can be advised by the expert.

What is frequency inverter used for?

Frequency inverter is also widely used in transmission, lifting, extrusion machine tools, and other machinery and equipment control fields, it can improve the level of technology and product quality, reduce the impact of the equipment and noise, and prolong the service life of the equipment.

What features do frequency inverters have in common?

Here you can see the main features that our frequency inverters have in common: The inverters are usually suitable either for single-phase mains voltage of 230 V as well as for three-phase motor voltage of also 230 V or for three-phase mains voltage as well as motor voltage of 400 V.
