SR Brackets are an open battery stacking system that is flexible, secure, and sets up in only a few minutes. Stack up to 8x SR5K-UL battery modules securely using the interlock hinges.

Battery cabinets are enclosed, safer, and easier to place near UPS equipment; battery racks are open, flexible for large systems, and often used in dedicated battery rooms.

Open Rack Cabinets are produced without cover considering the ventilation requirement of the system. The cabinet surface has been specially treated against wear and tear.
