Fire codes and standards inform energy storage system design and installation and serve as a backstop to protect homes, ...

Codes lly recognized model codes apply to energy storage systems. The main fire and electrical codes are developed by the International Code Council (ICC) and the National Fire Protection ...

To mitigate risks, a range of codes and standards guide the design, installation, operation, and testing of energy storage systems.

In summary: IP20-IP54: For indoor or sheltered environments. IP65-IP66: Standard for most outdoor ESS. IP67-IP68: For extreme or high-humidity conditions. ...

We facilitate the early adoption of energy storage technologies in support of the U.S. Department of Energy's (DOE) goals of an equitable, clean, resilient, and secure grid of the future.
