This product is a 200kW/480kWh industrial and commercial integrated energy storage cabinet utilizing Lithium Iron Phosphate (LFP) battery cells.

Summary: The Prague Deep Energy Solar Thermal Energy Storage Project is redefining how cities harness renewable energy. This article explores its innovative design, real-world ...

In the heart of Europe, Prague has emerged as a hub for container energy storage devices, combining compact design with high-efficiency power management. These modular systems ...

The 200kVA/300kWh energy container, when connected to the grid, can offer additional power thanks to its energy storage system in lithium-ion batteries. This technical device controls the ...

Each system is constructed in a environmentally controlled container including PCS, fire suppression, STS, HVAC and MPPT. Each complete system offers users a hassle free service ...

The plant's machinery and equipment consume a lot of electricity, resulting in high electricity bills. To meet this challenge, the plant installed a photovoltaic system on the roof ...

Constructed within robust shipping container enclosures, our energy storage systems are designed to withstand the elements. Protected from harsh weather conditions, our units are ...

Czech energy supplier and charge point operator CEZ has installed a fast-charging station with battery storage in Prague. It is the first of its kind in the Czech Republic. [pdf]
