What is the electricity access rate in the Democratic Republic of Congo?

The public version of the resulting report of the effort is available here. The Democratic Republic of Congo's national electric-ity access rate is estimated at 19%. Less than 1% of the rural population and 41% of the urban population has energy access. Of the country's 10 million house-holds,only 1.6 million have have access to electricity.

What is the main energy resource of the Democratic Republic of Congo?

Hydroelectric power(See Annex 1) is the main energy resource of the Democratic Republic of Congo. The DRC ranks first in Africa in terms of its potential (100,000 MW),which accounts for 13% of the global hydropower potential.

Could solar power be the future of energy in Congo?

Congo is one of the top five oil producers in Sub-Saharan Africa. But despite its rich energy resources,the electrification rate is low,especially in rural areas,mainly because of a lack of electricity infrastructure. But solar power could be the futureas it is also said to be cheaper for households.

How has DRC benefited from a grant-making and concessional financing scheme?

DRC has benefited from several grant-making and concessional financing schemes that have helped to unlock private capital for the off-grid solar sector. In 2021,the Swedish investment platform (Trine) en-tered a partnership with Altech,a leading company in the distribution sustainable energy products and ser-vices18.

In the AC, Democratic Republic of the Congo supports an economy six-times larger than today"s with only 35% more energy by diversifying its energy mix away from one that is 95% ...

In 2020, Power Africa awarded Bboxx with a grant to introduce pay-as-you-go (PAYGo) solar energy solu-tions. As a result, Bboxx sold more than 3,000 SHS kits which led to nearly 15,000 ...

A report by the Powering Peace organization states UN missions in the Democratic Republic of Congo could reduce expense and pollution by using off-grid solar to power operations instead ...

With an investment of an estimated EUR47 million with European Union co-financing, this project includes the installation of two battery energy storage plants, one at the site of the Delimara ...
