Does Africa Import solar panels from China?

This report presents Ember's analysis of Africa's imports of solar panels from China. The Chinese solar panel export data gives valuable insights because it includes imports up to June 2025, at a monthly granularity, and for every country in the world. The data can be found in Ember's China Solar Export Explorer.

Could China's solar panels help meet Africa's energy needs?

From Algeria on the Mediterranean coast to landlocked Zambia in the south, countries across Africa have been importing significantly more solar panels from China this year than in the past, which analysts say could be the start of a massive effort to help meet the continent's power demands with renewable energy instead of fossil fuels.

Are Chinese solar companies supplying Africa's solar demand?

Since Chinese solar companies have significant price advantages over manufacturers in other countries, they are always the go-to option for supplying Africa's solar demand. There are two types of demand driving the solar boom in African countries, Echard says.

Are Chinese solar panels exported to different countries?

Jones tracks the value of Chinese solar panels exported to different countries using Chinese customs data. In the first five months of 2025, he found at least 22 African countries imported more solar panels than they did during the same period last year, with most of them doubling the amount.

Chinese solar equipment has been flooding African markets, partly as a ripple effect of the US-China trade war. It's one of several ...

Where once fossil fuel plants and expensive diesel generators were the default option, solar has become the cheapest, ...
