---

The EVE 40PL 21700 battery is a high-performance lithium-ion rechargeable cell designed to deliver reliable power and extended runtime for high-drain devices.

Designed only for Li-Ion / LiPO Batteries. High performance, completely maintenance-free, low self-discharge. Nominal Voltage: 3,6V per cell. Charge Voltage: 4,2V per cell. Discharge Cut ...

The cells are dropped so as to obtain impacts in random orientations. Put the cells on rest for a Min. 1hr after drop, and then a visual inspection shall be performed. After standard charge, ...

The EVE INR21700-40PL is a high-performance Li-ion battery in the 21700 size, with a discharge current of up to 70 A. This makes it ideal for ...

EVE 21700 50E is 5000mah 21700 rechargeable lithium battery can be used for household & outdoor ESS.

At present, the technology most used for electric propulsion is based on lithium-ion cells. The power supply unit must often deliver a large amount of power in a short time, forcing the ...

Extreme Performance technology with 21700 battery cells ensures that this battery is optimized for high-demand tools. Designed for rapid charging, this battery has a built-in fuel gauge that ...

ICR, INR, NMC, LFP, primary, rechargeable, lithium ion, lithium ion phosphate, lithium manganese dioxide, lithium thionyl chloride, CR, ER, ...
