The Walo Storage facility, commissioned on July 14th, represents West Africa's first solar power plant integrated with battery storage specifically for grid frequency regulation.

The lithium-ion battery energy storage unit is the first battery-storage project in West Africa dedicated to frequency regulation and is ...

For Papa Toby Gaye, CEO of Senelec, "Walo Storage provides us with a vital tool to ensure stable and reliable electricity, while significantly contributing to the diversification of ...

Located in Bokhol, Senegal, Walo Storage is the first battery storage project in West Africa dedicated to frequency regulation to ensure grid stability. This project marks a significant ...

Senegal has begun commercial operations at a new solar energy facility that combines photovoltaic power with lithium-ion battery storage, the first of its kind in West Africa, ...

Independent power producer, Africa REN, has commissioned a 20MW of solar PV power plant with a 10MW/20MWh battery energy storage system (BESS) in Senegal. Named ...

State utility Senelec SA, in partnership with Africa REN, is adding 10 megawatts of battery storage that's capable of holding up to 20 megawatt-hours of electricity to an existing ...

Construction of the battery energy storage system is expected to commence in early 2024 at the Tob&#232;ne substation in Thies and is expected to become operational in 2025. ...
