Serbia is set to host one of the largest integrated solar and battery storage projects in Southeast Europe, marking another milestone in the region's renewable energy expansion.

The energy development strategy aims to generate 3.5 gigawatts from wind and solar power by 2030 and 10.97 gigawatts by 2040. Currently, EPS is building a solar and a ...

It covers projects across six sectors: electricity generation, transmission network, distribution network, natural gas, oil and petroleum products, and energy efficiency. The ...

This hybrid solar and storage project represents a strategic investment aimed at enhancing grid reliability, integrating renewable energy, and reducing dependence on fossil ...

Earlier in April, Fortis Energy announced that it would install 20 wind turbines in Jagodina and Rekovac as part of its 144-MW Juhor Wind Power Plant project in central ...

Storage: Large-scale deployment of variable/intermittent renewable power sources--i.e., wind and solar power--make grid balancing more challenging and can ...

With new wind and solar power plants, successful RES auctions, and groundbreaking projects in green hydrogen and energy storage, the country is positioning itself ...

State-owned power utility Elektroprivreda Srbije (EPS) and the Government of Serbia plan to develop a 500 MW wind farm project with a strategic partner, according to ...
