---

The New York State Energy Research and Development Authority selected renewable energy developer CleanCapital to erect the state's first "Build-Ready" solar facility ...

It will be one of the largest solar projects in the Adirondack Park, with enough energy to power 3,000 homes. A map that outlines the Benson Mines solar project site.

Learn how solar energy is revolutionizing mining operations, cutting costs, and improving sustainability.

Fortunately, there's a promising solution. Mining the Sun, a report by The Nature Conservancy, suggests that siting clean energy infrastructure on degraded lands like mining ...

Several new forms of photovoltaic (PV) installations have been proposed for advancing the deployment of solar energy while mitigating land-use conflicts. One prominent ...

Once built, this 12-megawatt solar project - sited on an iron-ore mine tailings pile - will be an outstanding example of the abundant opportunities for renewable energy ...

It will be one of the largest solar projects in the Adirondack Park, with enough energy to power 3,000 homes. A map that outlines the ...

A massive solar power expansion will require an equally massive mining expansion, as the minerals necessary to build millions of new solar panels remain deep ...
