Lithium battery module assembly line is mainly used in the production of new energy lithium battery modules, Prismatic battery modules, energy storage battery modules, power battery ...

High-speed robotic battery assembly with multi-axis precision control. Advanced battery pack nickel welding station with real-time quality monitoring. Precision BMS PCB soldering station ...

Optimized price performance for every usage scenario: customized design to offer both competitive up-front cost and lowest cost-of-ownership. Insulated containers: safe and secure ...

With years of consulting, information and intelligent equipment service experience in the lithium industry, we help enterprises build one-stop intelligent manufacturing solutions for lithium ...

Lithium battery module fully automatic assembly line is mainly used in the production of new energy lithium battery modules, Prismatic battery modules, energy storage battery modules, ...

It can automatically scan and obtain the bar code of the cell, classify the bar code of the pack, bind and record it, and fully trace the data information of product production and manufacturing ...

High-speed robotic battery assembly with multi-axis precision control. Advanced battery pack nickel welding station with real-time quality ...

The non-standard customized production line is mainly used to complete the assembly, welding, testing and assembly of industrial and commercial energy storage cell module PACK.
