---

According to EIA, The electric power sector will add 26 gigawatts (GW) of new solar capacity in 2025 and 22 GW in 2026. These ...

The EIA (U.S. Energy Information Administration) posted this forecast for 2025 on February 24, 2025. We expect 63 gigawatts (GW) of ...

Solar energy and battery storage will account for 81 percent of the total capacity increase, with solar energy representing over 50 percent. While renewable energy grows, coal ...

According to EIA, The electric power sector will add 26 gigawatts (GW) of new solar capacity in 2025 and 22 GW in 2026. These additions will boost U.S. solar generation by ...

Solar and wind accounted for almost 96% of new US electrical generating capacity added in the first third of 2025, according to FERC data.

Photovoltaic (PV) solar accounted for 56% of all new electricity-generating capacity additions in the first half of 2025, remaining the dominant form of new electricity-generating ...

Developers added 12 gigawatts (GW) of new utility-scale solar electric generating capacity in the United States during the first half of 2025, and they plan to add another 21 GW ...

According to the US Energy Information Administration (EIA), developers plan to add 64 gigawatts (GW) of new utility-scale capacity in ...
