In a move aimed at improving Yemen's electricity sector, the United Arab Emirates (UAE) has established six solar power stations in various areas, including Aden, Shabwa, ...

With the start of the Yemeni civil war, solar panels found their way into the country fast. On March 23, 2015, Sanaa experienced a major power outage. The Marib Power Plant, which supplies Yemeni cities with energy, went out of service. Consequently, the generator business flourished for awhile. However, due to the unstable conditions in Yemen, generators were not guaranteed to remain functional at all times because of increasing fuel prices and occasional lack of fuel. Yem...

Today, the International Energy Agency ranks Yemen as the least electrified country in the Middle East, with millions of residents forced to rely on costly diesel generators or go ...

Yemen, widely regarded as the Middle East's least electrified nation, is now benefiting from its first large-scale solar plant, which is helping restore power to tens of ...

ADEN, Yemen, Sept 30 (Reuters) - Yemen's first large-scale solar plant is helping to alleviate electricity shortages in the southern port city of Aden, ...

UAE-based Global South Utilities, an energy and water infrastructure company, is boosting its solar power generation capacity in Yemen to provide electricity to thousands of ...

UAE-based Global South Utilities (GSU), part of Abu Dhabi's Resources Investment LTD, inaugurated a 53-MW solar farm in the governorate of Shabwah, southeastern Yemen, ...

The completion of this 6.5 MW project underscores the growing importance of renewables in Yemen's power sector and highlights the country's abundant solar resources.
