Where can I find information about satellite ground stations?

Discover the world of satellite ground stations with [satellitegroundstation.com](https://satellitegroundstation.com), your premier online resource for in-depth insights and up-to-date information on global satellite communications. Explore, learn, and connect with the vast network of ground stations that power our world's connectivity.

What is ground station as a service (gsaas)?

See Figure 11.5 for 2024 KSAT LITE ground network map. Ground Station as a Service (GSaaS) is a managed service which enables customers to communicate, downlink, & process data from their satellites/spacecrafts on a pay-as-you go basis without needing them to build their own satellite ground stations.

What is a cloud-based ground station as a service?

The cloud-based ground station as a service allows satellite operators to receive their space data with near-zero latency over the Microsoft network.

What is a ground station interface?

Ground station interfaces are the gateway through which crucial data is transmitted to and from satellites, making them a critical component in the satellite communication network. Here are some key aspects of ground station interfaces:
